receive many letters from the Soviet Union and other countries of the United States. Their main idea is that the people of our country should maintain friendly relations for the sake of preserving peace and the future of our children. The author of one of these letters noted that the misunderstandings between Russians and Americans should be dispelled. The physicians movement regards the cessation of nuclear testing as the main goal of its activities at the same time the most important task in the vicious circle of the nuclear arms race. An end to testing would break the cycle of the nuclear weapons and create a new, even more destabilizing system. It would erect obstacles to putting nuclear weapons in
